BRAINNEST,
Lagos,
Nigeria.

Dear BRAINNEST Recruiting Team,

I am very excited to apply for the position of Data Analysis Intern on your team. I was very happy when I saw the opening for an internship position as it is something that I am enthusiastic about and I believe that my work ethic, learning curve, and communication skills will make me a great fit for your team. I am a passionate data analyst, with some background in web development also. I would love to contribute to the development of various ways of developing and executing business-critical projects while gaining relevant industry work experience.

I previously interned earlier this year in a Textile factory in the Quality control department and this experience left me with a very great appreciation for the need for clean, and tidy data. During my time there I was able to help my supervisor design a way of using Google sheets to collect needed data on various samples of materials and make fast calculations thereby reducing the lag in getting actionable data for carrying out administrative decisions. I also try to do challenging open source projects which help me broaden my understanding of data from various industries.

In other to gain more analysis experience I participated in the Alx-Udacity Introduction to Data Analysis with python program which helped me in gaining knowledge of the Data industry's most used tool for all kinds of Data analysis. The program was completely virtual with classes held twice a week on zoom. While the grading was project-based and was graded by Industry professionals from all across the world. I was able to finish the three required projects for certification and they all were focused on various aspects of Data Analysis. I have since then been doing open source projects and I believe that this internship with your company will help me sharpen my analytics skills and further my domain knowledge under skilled supervision.

I hope to bring in a different perspective, and inquisitive mind with great adaptability and discipline. I look forward to speaking with you and I am available for a call on any channel you would prefer. Thank you for your consideration

Best Regards,

John Tolulope Afariogun.
